

From: Dr. Mark Wormald
Associate Director of Teaching, Department of Biochemistry

6th July 2020

To all students holding offers for Biochemistry

Pre-course Maths Booklet

Dear Student,

All undergraduates on the Biochemistry course do a Quantitative Biochemistry course in their 1st year, comprising lectures and departmentally organised problems classes. To help students prepare for these we have produced a set of Maths resources for you to work through before arriving in Oxford. The lectures and problems classes will assume that you are familiar with all of this material.

A hard-copy of the pre-course booklet is available to view and download at:

Web address: <https://learntech.medsci.ox.ac.uk/mathsworkbook/>

You will need to enter your UCAS number and email address in order to download the booklet. If you have difficulties in accessing this site, then please e-mail msdlt@medsci.ox.ac.uk.

Once you have registered your e-mail address at the above site, you will be sent details of how to access the online resources. These include everything that is in the hard-copy booklet, plus extra practice problems with hints and worked answers.

We strongly recommend that you work through these resources and brush up any areas about which you are not confident before you arrive in October. If you find any of the material difficult, then please don't worry but let your College tutor know when you arrive in Oxford.

We very much look forward to seeing you in October.

Yours,

Dr Mark Wormald
